Garcia Fernanda Valenca Archadea

Information Technology | Politeknik Negeri Malang

Coordination Role: Team Leader

PERSONAL DETAILS & CONTACT

Full Name	: Garcia Fernanda Valenca Archadea
Place, Date of Birth	: Malang, 09-06-2006
Institution	: Politeknik Negeri Malang
Major / Grade	: 3rd Semester of Information Technology Program
City of Residence	: Malang, East Java
Email	: garciavalencza@email.com
WhatsApp	: +62 813 - 3905 - 9343
LinkedIn	: https://www.linkedin.com/in/garciavalencza/
GitHub / Portfolio	: https://github.com/Valencza

TEAM ROLE

☒ Team Leader Coordinates the team, manages the timeline and task division, and leads the final pitch strategy.	☐ Technical Lead / AI Engineer Designs the system architecture and builds the AI model and core technical features.
☐ UI/UX & Presenter Designs the user interface and experience, and presents the solution to the judges.	☐ Advisor (Lecturer) Mandatory. Guides the team and gives feedback on problem framing, solution, and feasibility.

PROFILE SUMMARY

Third-semester Informatics Engineering (D4) student at Politeknik Negeri Malang focused on fullstack web development with a backend emphasis. Experienced in building end-to-end systems with Next.js, PostgreSQL, Prisma, and Docker, including applications actively used by real clients. Brings the ability to ship working REST APIs, databases, and UI quickly, which fits rapid prototyping in a hackathon team.

SKILLS

Category	Skills	Level
Programming Languages	Java, TypeScript, JavaScript, PHP	Intermediate
AI / Data	Python, LLM API integration (prompt-based, structured JSON output)	Beginner
Web / Mobile	Laravel 11, React, Next.js, React, REST API design & development, Tailwind CSS, Bootstrap, GORM	Intermediate
Database	MySQL, PostgreSQL, Prisma ORM	Intermediate
Tools & Platform	Docker (Containerization, Environment Configuration), Midtrans, JWT Authentication, Supabase, GIT	Intermediate
Soft Skills	Problem Solving, Teamwork, Adaptability	Intermediate

PROJECT PORTFOLIO

Project 1	
Project Name	Multi-Warehouse Inventory Management System
My Role	Fullstack Developer (backend focus)
Tech Stack	Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, REST API, Docker
Brief Description	Manual stock tracking across multiple warehouses makes stock movements hard to monitor and audit. I built a web system with real-time stock monitoring, inter-warehouse transfers, and role-based access control, with a complete audit trail of all user activity.

Project 2	
Project Name	Point of Sale (POS) System (Real Client)
My Role	Fullstack Developer
Tech Stack	Next.js, PostgreSQL, Prisma, REST API, Docker
Brief Description	A client needed to digitalize daily sales operations. I developed the web-based POS end-to-end with sales transactions, product management, and reporting, and it is actively used in the client's business.
Links	Live system is private (used by client). Source code available upon request.

HACKATHON & COMPETITION EXPERIENCE

Year	Event / Organizer	Role	Achievement
2025	Competition Internal JTI Politeknik Negeri Malang - Hackathon	Team Lead	Participant
2025	Techomfest - Web Application	Team Lead	Participant
2025	Competition Internal JTI Politeknik Negeri Malang – Create a Field of Innovation	Participant	Participant

EDUCATION

Period	Institution	Major / Study Program
2025–present	Politeknik Negeri Malang	Diploma 4 (D4) Informatics Engineering
2022–2025	SMK Negeri 4 Malang	Software Engineering

CERTIFICATIONS & TRAINING

- Python Essentials — Cisco Networking Academy, 2022
- C# Programming Certification — SMK Coding, 2022

ORGANIZATIONS & OTHER EXPERIENCE

- Fullstack Web Developer Intern — Createch, January 2024 – December 2024: Developed web applications end-to-end, from frontend to backend and deployment, including admin dashboards and a company profile website, with Docker and SQA for stable releases.
